

**Supplementary Table 1. Correlation among T cell responses to BKV-specific antigens and peak level of BKV viral loads (n = 40)**

Spearman's correlation	T cell response measured using ELISPOT				
	Large T	Small t	VP1	VP2	VP3
Peak plasma BKV-DNA PCR (log)					
Rho	-0.228	-0.070	-0.180	-0.168	0.003
p value	0.156	0.672	0.308	0.308	0.985

BKV, BK virus; ELISPOT, enzyme-linked immunospot; PCR, polymerase chain reaction.
