

Supplementary Table 4. Immunosuppressive medications administered to patients with AAV with and without mortality

Immunosuppressive medications	Patients with mortality (n = 15)	Patients without mortality (n = 102)	p value
Glucocorticoid	14 (93.3)	92 (90.2)	0.999
Cyclophosphamide	6 (40.0)	53 (52.0)	0.389
Mycophenolate mofetil	2 (13.3)	8 (7.8)	0.615
Azathioprine	4 (26.7)	37 (36.3)	0.571
Tacrolimus	2 (13.3)	4 (3.9)	0.170
Rituximab	3 (20.0)	8 (7.8)	0.149
Methotrexate	1 (6.7)	5 (4.9)	0.569

Values are expressed as number (%).

AAV, anti-neutrophil cytoplasmic antibody-associated vasculitis.
