

Supplementary Table 1. Considerations when issuing oxygen prescription

Variables for prescription criteria	No. (%)
Following the patient's condition (severity)	7 (23.3)
To maintain oxygen saturation	13 (43.3)
Following the arterial blood gas analysis	3 (10.0)
Following the oxygen saturation and arterial blood gas analysis	3 (10.0)
Etc. ^a	4 (13.3)

^aIncluded 'Consider sleeping and resting time,' 'Prescribe at the flow rate used during hospitalization,' or 'Decide more than 15 L/day within the range that hypercapnia is not observed.'
