Supplementary Figure 2. Inconsistency plot between the direct and indirect effect estimates for the same comparison. Inconsistency factor (IF) as the absolute difference with 95% confidence interval (CI) between the direct and indirect estimates for each paired comparison is presented. IF values close to 0 indicate that the two sources are in agreement. (A) Overall post-endoscopic retrograde cholangiopancreatography (ERCP) pancreatitis (PEP), (B) mild PEP, (C) moderate-to-severe PEP, (D) average-risk group, (E) high-risk group. D or Dic, diclofenac; Dic_L, diclofenac low dose; Double, double dose of indomethacin; Epi, epinephrine; I or Ind, indomethacin; LR, lactated Ringer’s solution; Nap, naproxen; Nit, nitrate; NS, normal saline; PD, pancreatic duct; Pla, placebo; soma, somatostatin.
