

Supplementary Table 3. Multivariate analysis to evaluate the histological features associated with disease progression in UC patients with mild endoscopic activity

Histologic feature	OR (95% CI)	<i>p</i> value
Serrated architectural abnormalities	1.76 (0.82–3.79)	0.147
Nancy index	2.071 (0.964–4.447)	0.062

CI, confidence interval; OR, odds ratio; UC, ulcerative colitis.
