Supplementary Figure 3. Interval plot showing study outcomes in comparison with four nucleos(t)ide analogues using network meta-analysis. (A) 48-week virologic response. (B) 96-week virologic response. (C) 48-week biochemical response. (D) 48-week serologic response. ETV, entecavir; BSV, besifovir dipivoxil maleate; TAF, tenofovir alafenamide; TDF, tenofovir disoproxil fumarate; CI, confidence interval.
