Supplementary Figure 5. Comparison of fatigue improvement according to underlying disease (PP analysis). (A) Fatigue improvement based on FACIT-Fatigue scale according to underlying disease during double-blind phase week 0–12. (B) Fatigue improvement based on Fatigue VAS according to underlying disease during double-blind phase week 0–12. (C) Fatigue improvement based on FACIT-Fatigue scale according to underlying disease during overall period week 0–24. (D) Fatigue improvement based on Fatigue VAS according to underlying disease during overall period week 0–24. KRG, Korean Red Ginseng; FACIT-Fatigue, The Functional Assessment of Chronic Illness-Fatigue; VAS, visual analog scale; PP, per protocol.
