

Supplementary Table 3. Data timepoints for each objective

Objectives	Data timepoints				
	Baseline	6-months ^{a)}	12-months ^{a)}	24-months ^{a)}	Any visits after 12-months ^{a)}
Patient demographics and baseline characteristics	x				
Patient demographics, stratified by BEC	x				
Patterns in BEC, stratified by clinical characteristics	x	x	x		
Patterns in BEC (impact of BEC on the number of moderate and severe exacerbations following enrolment)	x	x	x	x	x
The stability of BEC measurements over time	x	x	x	x	x
Quality of life (as evaluated by PROs)	x				
Treatment patterns among the COPD cohort	x	x	x		

BEC, blood eosinophil count; PRO, patient-reported outcome; COPD, chronic obstructive pulmonary disorder.

^{a)}There is a \pm 3-month time window for each visit.
