

Figure S4. Total numbers and rates of adverse effects of medical treatments at the global level, both sexes, 1990–2021. (A) Total number of prevalent cases, incident cases, DALYs and mortality. (B) Rates (per 100,000 population) of age-standardized and all-age prevalent cases, incident cases, DALYs and mortality. Shaded regions indicate 95% uncertainty intervals. DALYs, disability-adjusted life-years.
